MEDICINAL

"So you've set up a hired girl," said farmer Muchland to his son. "Your mother never had a hired girl. She worked early and late, and raised a family. Hired girl indeed! Look at your mother, sir."

"It's just looking at mother," said the son, "made me resolve that my children's mother should never look like her, worn out in her prime."

In the partnership of marriage women give twice as much as men. They give equal work, and they give themselves, their very life. Children come, no chance for rest, work must go on. Inflammation, ulceration, debilitating drains and female weakness, undermine the health and shock the nervous system. In a few years the woman is worn out.

Women who have used Dr. Pierce's Favorite Prescription say that they can do their own work and keep their strength and good looks. It cures inflammation, ulceration, female weakness and unhealthy drains.

Sick women are invited to consult Dr. Pierce by letter, free of charge.

Between two years ago my health became very poor from female weakness and troubles peculiar to my sex; in fact I was so weak and feeble that I was unable to do but little work, writes Mrs. J. M. Gress, of Balleston, Culman Co., Ala. "I decided to buy a bottle of two of Dr. Pierce's Favorite Prescription and give it a trial. I took two bottles of the 'Favorite Prescription' and one of the 'Pellies' and these proved to be all I needed. I felt stout and well after taking Dr. Pierce's medicine and have been doing my work with more satisfaction than I had ever felt before."

The People's Common Sense Medical Adviser, sent free on receipt of stamps to defray expense of mailing only. Send 21 one-cent stamps for paper-bound edition, or 31 stamps for cloth. Address Dr. R. V. Pierce, Buffalo, N. Y.

FIGHTS WITH WILD FOWLS.

One of the keepers of the Hog Island light relates a remarkable experience with wild fowls had by the keepers of that light on the night of February 22.

Between 7 and 8:30 p. m. the watch on duty was aroused by the "hooting" of wild geese and brant, accompanied by the crash of breaking glass. He hastily summoned the other keepers, who responded with shotguns. They opened fire on the bewildered birds with every gun. The battle lasted for an hour and a half. The guns got so hot that it was dangerous to use them and the shoulders of the men became sore from the recoil.

The supply of ammunition gave out and the fight ended. In the morning there were found 288 dead brant, geese and ducks at the foot of the tower. On the following Saturday morning the tower was again attacked by the birds. There being no stock of cartridges on the island, the guns were useless, but the keepers fought with sticks and captured 150 fowls, when a flock, apparently containing thousands, rushed upon them. They were compelled to seek shelter within the tower. So powerful was the flight of the frightened geese that the wire screens were penetrated, the lights in the watchroom extinguished and the panes in three windows destroyed.

These fowls had taken wing because of the severe weather prevailing upon their feeding grounds and were blinded by the intense glare of the powerful light in the top of the tower. Hog Island marks one of the most dangerous shoals on the Virginia coast. It is an iron tower and stands 180 feet above mean high water. It is a first class light and can be seen from the bridge of a steamer a distance of about 25 miles.

A FRENCH CURE FOR GRIP.—After having nearly recovered from its usual epidemic of influenza London received from Paris a "safe cure" for the complaint. The discoverer is Dr. Borne, Deputy for Doubs, who cured M. Waldeck-Rousseau in three days, and was also successful with President Loubet, M. Dechaenel and several of his brother deputies. Dr. Borne's remedy is as follows:

As soon as one feels the symptoms of influenza one should have the two following prescriptions made up, firstly:

Chloroform water.....2 ounces.

Water.....2 ounces.

Magnesia.....2 drachms.

Salo.....15 grains.

Betol.....15 grains.

Antifebrin.....15 grains.

Syrup of orange flowers.....1 ounce.

This must be well shaken and a tablespoonful taken every fifteen or twenty minutes during the first day.

On the following day one should take two cachets on rising in the morning and two on going to bed at night, composed as follows:

Magnesia.....2 1/2 drachms.

Betol.....75 grains.

Salo.....45 grains.

Terpin.....45 grains.

For 20 cachets.

Dr. Borne, who made no difficulty about rendering his efficacious prescriptions public, said his principle was that all the digestive, respiratory tubes, &c., should be disinfected. He had experimented with all the antiseptics capable of combination, and had eventually arrived at the kind and doses given in the prescriptions. Of course, the doses were modified according to the age, condition, &c., of the patient. Dr. Borne considers the replacing of antipyrine by antifebrin to be important, as antipyrine often affects the kidneys.

LONDON HAVES OVER A BEAUTY.—A Society in London is at the feet of a new American beauty, Miss Vanderbilt Wackerman. Exactly who she is nobody appears to know, but her success has been instant and complete.

Artistic London has gone mad over her. She is tall, with the figure of a goddess, a most beautiful face, large brown eyes, strongly marked eyebrows, straight nose and cupid-bowed mouth, while her coloring is very brilliant. Her hair is of a beautiful unburnished gold. She made her first public appearance at a masque in Guildhall, and the president of the academy was so struck by her beauty that he is painting her portrait for the academy. Ellis Roberts is painting her as Pallas Athena, all white, with a gold, helmet-like ornament on her golden hair.
